Management Philosophy

We create new added value in flexible cables and become the leading authority in this market.

Message from CEO

We believe that young people envision various forms of happiness and dreams for their future.

These aspects of life are shaped by their experiences, such as friendships and the environments in which they were raised.

However, as they step into society, their dreams and perceptions of happiness may become more grounded in reality.

At Nippon Flex Controls, we aspire to support them in contributing to the future by gaining diverse experiences outside the company and introducing small innovations, while collaborating with customers, colleagues, and friends—both within and

Furthermore, we hope they will define and realize the kind of happiness they truly seek in life.

We would be honored to share our journey with young individuals who resonate with the corporate culture fostered by their predecessors and who share the same vision.

And with this aspiration, we cultivate our philosophy by staying true to our guiding principles.

1. Bring joy to our customers
2. Bring joy to our colleagues
3. Be creative and resourceful
